Disabling Changing the Proxy Settings
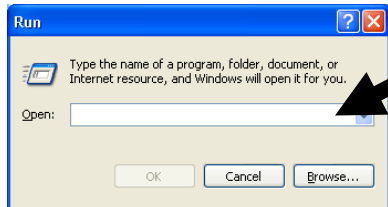

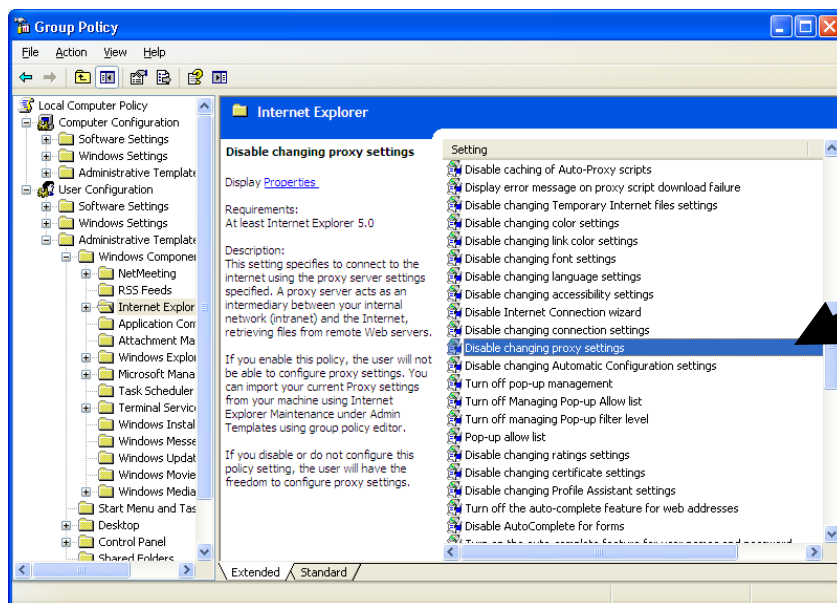

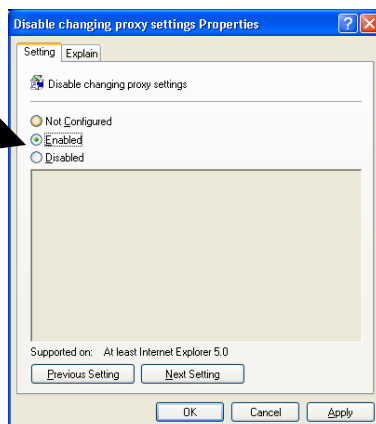

1. Open the Group Policy snap-in.

    a. To open the Group Policy snap-in, click on Start > Run and the following dialog box appears.

    b. Type "**gpedit.msc**" in the text box.

    c. Click **OK**.

2. Navigate through **User Configuration / Administrative Templates / Windows Components / Internet Explorer**.

3. Double-click the **Disable changing proxy settings** policy and set it to **Enabled**.

4. Press **Apply** and **OK**.
